

Americans will eat
1.4 BILLION
chicken wings during
Super Bowl LIV
weekend

How do
1.4 BILLION
chicken wings
measure up?

+27 million
2% more wings
than last
year

Weights
in at
175 million
pounds

Enough to give
every Super Bowl
attendee since 1967
342
wings each

If each
wing
were
1 SEC.
it would
equal
45 YEARS

More than
825,000
WINGS
for every player
in the NFL

1,500X
weight of an entire NFL
team inside their
team buses

Laid end to end,

would line the
Florida coastline **>9X**

OR
Circle
the earth **3X**

Super Bowl LIV
played at the
Hard Rock Stadium
in Miami Gardens, FL
