# AZOMITE®

NATURAL TRACE MINERALS FOR EVERY CROP

America's premier volcanic ash based natural mineral fertilizer since 1942. AZOMITE® replenishes macro and minor trace minerals to support soil fertility for maximum plant performance. Adding AZOMITE® improves efficacy of Conventional and Organic listed NPK fertilizers.

AZOMITE® supports rich microbial diversity in the root zone for better nutrient uptake. Its composition is rich in bioavailable nutrients, silica and a bit of mineral clay, to enable better water efficiency and the formation of soil aggregates; especially needed in drought prone, sandy soils.

# NOVIHUM VS. COMPOST

## WHAT MAKES NOVIHUM DIFFERENT FROM COMPOST?

- A stable organic matter just like what nature provides in abundance in naturally fertile soils
- Therefore it outlasts any other organic matter source, especially in climates that "burn up" organic matter
- Rates of less than 500 lbs/acre easily applied with traditional fertilizer application methods
- No contamination from sodium, pesticides, herbicides, or seeds
- Odorless & not a source of pathogens

# CONQUER YOUR FIELD

## OVERCOME THE THREAT OF PESTS WITH BOTANICALS

When mites, soft-bodied insects, or lepidopteran pests threaten your field, preventative sprays with botanical oils early in the season are key to success. As an expert in essential oils, we supply growers with contact biopesticides and repellents made with a proprietary rosemary blend and garlic oil that effectively control key citrus pests thanks to their multiple modes of action. Add TetraCURB™ MAX and Gemsei™ to your rotation today!
